

The perfect finish to your perfect holiday home

wcd Westcountry
Decking Ltd

For the ultimate finish in decking, our PVC range can be built to any specification. Alternatively, you can choose from one of our many pre-built designs which will be installed quickly, quietly and safely, minimising any disturbance to owners and holiday makers.

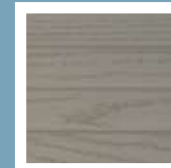

All of our product ranges are installed with party loading in mind.

We have a wide range of products and colours to suit your lodge or caravan. If, however, there is something specific you require we will source it for you. We can even match any colour you choose for your decking, balustrades and skirting*.

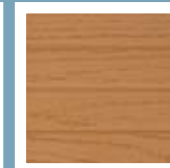

**Minimum order required*

Decking Colours

Driftwood

Cedar

Beige

Dark Green

Sage Green

White

uPVC Decking

Wood is a natural building material and our timber comes from sustainable sources in Scandinavia, Russia and the Far East where planting exceeds the rate of harvesting.

Designed to your specification and with park regulations in mind, the deck will be the perfect finishing touch to your new holiday home, built using high grade soft or hardwood timber and to a very high standard.

Your deck can incorporate many accessories including lighting, lockable timber gates built to match your balustrade, custom built stairways and under frame storage.

All our timbers are fully treated to enable a much longer life span for your deck.

Timber Decking

Whether it's a caravan, lodge or park home, our decking systems are constructed by our own fully qualified carpenters who have many years experience building verandas on holiday parks.

Balustrade Options

Glass Panel

Standard Picket

Bowed Picket

Skirting Options

Fully Enclosed

Ranch Style

Custom Made Options

If you are looking for a degree of privacy, we can have your glass panels either fully sand blasted or sand blasted with writing. You could even try the latest glass panel with the etched spindle look.
